## **Climate Law & Governance Day 2019**

**Friday, 6 December 2019**

*During the United Nations Framework Convention on Climate Change COP25  
Universidad Autónoma de Madrid Faculty of Law, 1 Calle Kelsen, 28049 Madrid, Spain*

Co-hosted by the Universidad Autónoma de Madrid, the University of Chile and the University of Cambridge, Climate Law & Governance Day (CLGD) 2019 Symposium is taking place on 06 December 2019 during the 25<sup>th</sup> Conference of the Parties (COP) of the UNFCCC in Madrid, Spain. CLGD 2019 follows key preparatory events this year, especially the Legal Roundtable on 22 June 2019 in Bonn, Germany, and the Climate Law Experts Panel at the pre-CoP25 Conference and related academic lecture 08 October 2019 at the University of Costa Rica in San Jose, Costa Rica. CLGD 2019 provides an important opportunity to share ideas, debate trends and advances and build legal momentum for climate action. CLGD 2019 builds on the success of CLGD 2015 at La Sorbonne Law School during COP21 in Paris, CLGD 2016 at the Université Privée de Marrakech and Hassane I University during COP22 in Marrakech, CLGD 2017 with the University of the South Pacific at the University of Bonn during COP23 in Bonn, and CLGD 2018 at the University of Silesia in Katowice, Poland, among other earlier events since the first Climate Law & Governance symposium in 2005 at McGill University in Montreal, Canada.

Legal and institutional transformation is urgently required to support efforts to limit global temperature increase to 1.5°C above pre-industrial levels; to adapt to the adverse impacts of climate change; to foster climate resilience and low greenhouse gas emissions development; and to make finance flows consistent with a pathway towards sustainable development. Over 160 countries have stressed the importance of legal and institutional reform in their Nationally Determined Contributions (NDCs) to the global response to climate change under the Paris Agreement. As over 50 countries emphasize in their NDCs, increases in law and governance capacity and practice are crucial to implementing the Paris Agreement. As Paris Agreement representatives, observers and stakeholders gather in Madrid for the UNFCCC COP 25 from 2-13 December 2019, CLGD 2019 will convene a community of leading law faculties and legal institutes, international organization counsel, government authorities, law associations, judges, professionals and others responsible for inspiring, innovating and building law and governance capacity. The common themes for 2019 are:

1. **Advancing Paris Agreement Innovations** – New Rules for Transparency, Markets & Non-Market Instruments, Finance, Loss and Damage, Compliance and Safeguards  
*What are the key advances in the Katowice Rulebook for international climate law and governance? What are the most pressing legal obstacles and opportunities to low GHG emissions and climate-resilient development? How can transparency, accountability, stakeholder participation and regulatory reform promote more effective climate action while realising sustainable development imperatives? How can market and non-market, human rights and climate loss and damage instruments incentivize higher ambition internationally? How will the Paris Agreement compliance mechanism help?*
2. **Scaling-up National & Regional Climate Legal Frameworks for Action** – Effective Climate Governance, Ecosystems-Based and Human Rights Responses, Human Mobility and Climate Justice  
*How can national climate action be effectively supported by law, governance, innovation and public participation to scale up Paris Agreement implementation? What are the trends? What are justice sector reform and governance innovations contributing to low-carbon sustainable development in key countries and regions? How can we transparently incentivise and govern climate action, new financial flows and low-carbon development pathways? How can public participation, gender and rights-based strategies, loss and damage, and climate migration be actively addressed by all?*
3. **Local & Global Interlinkages & Engagement** – Climate in Regimes on Oceans, Biodiversity, Ozone, Civil Aviation, Trade and Investment, Peace and Security  
*How do international legal regimes outside of the UNFCCC interact with climate law and policies? How do these regimes offer opportunities for increased climate action and more effective implementation of the Paris Agreement? Where are the synergies? What gaps remain?*
